

BRIDGES BRIDGES BRIDGES

Our bridge engineers are available to plan, design, restore or evaluate many types of bridge structures. Our professionals have provided highway bridge designs for major clients such as the Ontario Ministry of Transportation. Projects involving new structures or the rehabilitation of existing bridges and culverts have been designed with construction staging techniques as well as other special methodologies. Traffic maintenance during construction utilizing simple to the more complicated signaling systems have often been an integral part of the design services.

Cook Engineering provides:

- Bridge Design in Steel, Concrete, Timber
- Railway Bridges
- Highway Bridges
- Pedestrian Bridges
- Construction Management
- Hydrology and Hydraulics
- Associated Environment Assessments
- Permits and Approvals
- Life Cycle Analysis
- Tendering Strategies
- Traffic Control Design
- Contract Administration
- Inspection Services
