

# CAPEX CAPEX CAPEX

**Capital AP**propriation **EX**penditure is a common acronym for Feasibility Study Project Cost Estimate. Working with operations, engineering and maintenance departments we will evaluate project feasibility and develop objectively an “Opinion of Probable Construction Cost”. A cost benefit analysis is also completed to determine a project’s return-on-investment in order to rank multiple projects based on their payback. This is a cost effective service which assists the ever shrinking plant engineering departments.

- Multi-Discipline Review
  - Civil
  - Structural
  - Mechanical
  - Piping
  - Electrical
  - Instrumentation
- Process knowledge
- Proven cost estimating standards
  - Opinion of probable construction cost
- Objective project feasibility evaluation
- Cost benefit analysis
  - Project return-on-investment calculations
