

ENVIRONMENTAL ENVIRONMENTAL ENVIRONMENTAL

Cook Engineering's diverse expertise is complimented by our ability to provide environmental impact assessments to meet regulatory requirements and public concerns. We understand the effect of construction activities on our ecological resources. Using proven environmental engineering technology, we assist our clients in reducing emissions, developing closed systems and providing efficient, environmentally conscious solutions.

- Air Dispersion and Combustion Modeling
- Incineration Techniques
- Scrubber Installations
- Electrostatic Precipitators
- Effluent Treatment and Monitoring
- Instrumentation and Control
- Piping, Pumping and Process Design
- Environmental Compliance and Permitting
- Environmental Impact Assessment and Study Reports
- Contaminated Site Assessment and Remediation
- Noise and Vibration Assessments
- Waste Management, Landfill and Hydrogeological Assessments
- Watershed Monitoring and Hydrology
- Fisheries and Aquatic Ecosystem Assessments
